Project ID 00998

Dr. Rajesh Katare  
Department of Physiology, UoO

Dear Rajesh

**REF: Novel blood based biomarkers as simple prognostic tool for ischemic heart disease**

I am writing to inform you that before the above referenced research is undertaken within the Southern District Health Board, I need to verify that the appropriate Ethical Approval is in place.

Once this has been done and the unconditional approval is received, could you please fax or forward my a copy.

While the other documentation requirements have been satisfied, until the Ethics Committee approval is verified the project cannot be given approval to commence.

If you have any questions with regards to this process, please contact me quoting the project ID shown above.

Yours sincerely

Ruth Sharpe  
CLINICAL RESEARCH ADVISOR
