Associate Professor Charlotte Hesper
School of Medicine
The University of Notre Dame Australia
PO Box 944
Broadway NSW 2007

Dear Charlotte,

Reference Number: 018109S

Project Title: "Inhaler technique mastery and maintenance in general medical practitioners: Easy Low Instruction Over Time (Dr ELIOT)."

Thank you for submitting the above project for Low Risk ethical review. Your application has been reviewed by a sub-committee of the University of Notre Dame Human Research Ethics Committee (HREC) in accordance with the *National Statement on Ethical Conduct in Human Research* (2007, updated May 2015). I advise that approval has been granted conditional on the following issues being addressed:

- Researchers to please clarify how the Chief Investigator will be responsible for the monitoring of the research project in Section 1.10.
- Researchers to include funding information in the Participant Information Sheet (PIS). (NS 5.2.7)
- Researchers have ticked No in Section 5.1d regarding future of data but information included in the PIS and Consent Form indicates that it will. Researchers to clarify and amend as necessary.
- Researchers to please clarify what and how feedback will be provided to participants as information differs between Section 5.2b and the PIS.

Please send your response addressing each of the issues as listed above, including supporting information where applicable, to me at Natalie.Giles@nd.edu.au by **3 September 2018**. Failure to respond and/or communicate by this time could result in a suspension of the ethical review of the project.

Yours sincerely,

Dr Natalie Giles
Research Ethics Officer
