8 August 2023

Dr. Mehtash Butt
Senior Resident, Anesthesia & ICU Department
BDF Royal Medical Services

RE: "Effect of Perioperative oral pregabalin in Total Knee replacement for postoperative pain."

Dear Dr. Mehtash,

Thank you for submitting your aforementioned Research Ethics Committee proposal, which is planned to be undertaken at the Royal Medical Services of the Bahrain Defence Force. Your application has been reviewed (delegated review) and it gives me pleasure to inform you that it is ethically acceptable as is.

We expect your research to commence within the next 12 months and please inform all related parties to your research. Also, please note that all information collected from the RMS- BDF should remain confidential and any patient identifying numbers should be destroyed within 1-year time of completion of your research.

Please note that it is mandatory to update the Publications & Publications Ethics Committee at BDF-RMS about completion, or changes in the mentioned study. In addition, the researchers are required to submit copy of the published study upon publication.

While selecting the journals for publication, kindly refer to the journal selection criteria of BDF- RMS or contact the P&PEC Committee through the mentioned email for assistance (research@cpctmr.org). The Committee will not be responsible if the publication is not accepted for promotions or training due to publishing in journals which do not fit the criteria mentioned, due to lack of consultation before publishing.

Please feel free to contact us for any further assistance.

Yours Sincerely,

Dr. Mohammed A. Al Muharraqi
